- **Accessibility features on the iPad** that may assist individuals with autism (Guided Access, Speak Selection, Turn off Multitasking Gestures)

On iPad, go to Settings, General and Accessibility:

**Speak Selection:** This will speak aloud selected text.

**Guided Access:** This features keeps the iPad in single app and allows you to control which features are available.

**Back in Settings and General:** If you turn off **Multitasking Gestures** then it turns off the ability for a student or child to swipe left or right between apps.
